

## **Modern Scientists Discover...Great-Grandma's Home Health Secret?**

Yes, it's true.

Doctors at Yale New Haven Hospital are using a revolutionary treatment. It keeps patients safe from "post-op" infection. It prevents disease. It's all natural. Best of all, it's safe for the planet.

And it tastes delicious!

What is this miracle advancement in science?

Surprisingly, it is something your Great-Grandma knew about – and used. For thousands of reasons.

"It" is Apple Cider Vinegar. The hospital uses it as a disinfectant!

This amazing golden liquid was all but forgotten during the 20th century. New-fangled, "better" products replaced it.

Today, modern science is beginning to appreciate what Great-Grandma took for granted.

### **Now You Can Discover Her Secrets!**

Emily Thacker brings this knowledge back in her latest work.

"The Vinegar Anniversary Book" shares:

- Long-Lost Vinegar Lore
- The Latest Research
- Brand New Remedies
- 1,000s of uses!
